reconstruction
prospective
(a) gains, 100 cities (grey: registered construction)
(b) same-day arms, paired
first two, recalibration only (registered H1)
+13.7
background, read on the day (registered H3)
+40.8
first two, read on the day
+58.8
background as registered, read on the day
+57.7
background from two outer stations
+57.2
mean of two outer stations
+59.0
0
50
% reduction in daily RMSE over the free estimate
background − first two, both on the day
background (two stations) − first two
mean of two outer − first two
background − first two, exceedance loss
−2
0
paired difference, points of gain
